Career Objective

Passionate and enthusiastic 2nd-year student with strong interpersonal skills and a keen interest in developing innovative projects that solve real-world problems.

Education

University: Amrita School Of Computing, BTech in Computer Science Engineering Sept 2023 – April 2027

- CGPA(3rd Sem): 8.79/10
- **Coursework:** Computer Architecture, Comparison of Learning Algorithms, Computational Theory

Experience

Development of projects with unique and creative design visualizing it be more attractive and good.

Projects

Online Events Organization (Based on Frontend Development Project)

- Developed an Events Management website with various services, different events, venues, E-invitations, and also containing Contact Info.
- Tools Used: HTML, CSS, Javascript, UI/UX article [hyperref](#) xcolor

[My Web Project:](#)

[Click to Open My Project Page](#)

Used in Real-time

2024

- Events Planning Organization Organizers can list events, select venues.

Technologies

Soft skills: Communication, organization, Teamwork, problem-solving, Critical Thinking, Time Management, creatively Thinking ideas, Presentation, Leadership, Adaptability, Decision Making

Languages: C, Java, Python, SQL, HTML, CSS, JavaScript

Technologies: Artificial Intelligence with Python, DSA, Python, Java, and Frontend development.

2023-2024

Certifications

- Supervised Machine Learning: Regression and Classification (Coursera) 2023-2024
- Artificial Intelligence with python in Coincent
- Microsoft Certified: Azure AI Fundamentals (Microsoft)
- Internship Certification: Artificial Intelligence (Coincent)

Badges

- Microsoft Certified: Azure AI Fundamentals
- HackerRank in Java (3Star)
- HackerRank in Python (3Star)
- Unstop code Contest points

Future Innovation and Project Ideas

– **Smart Handbag with Biometric Lock GPS Tracking (Upcoming Project)**

*Planned development of a smart handbag integrating fingerprint authentication, real-time GPS tracking...

*Aims to implement magnetic charging, LED indicators, and emergency alerts for theft prevention.

* (It is not only for handbags but this fingerprint authentication is also used for trolley bags, doors, etc.....)

– **Bags Shopping App**

* **Bags like** School bags, highly branded handbags for women, wallets for both men and women, etc.....

* **Features:**

1. **User Authentication** – Sign-up, login, and secure account management.
2. **Product Catalog** – Listings with images, descriptions, and prices.
3. **Search & Filters** – Sorting by brand, price, and categories.
4. **Cart & Checkout** – Seamless shopping experience with a payment gateway.
5. **Wishlist** – Users can save favorite handbags for later.
6. **Reviews & Ratings** – Customers can leave feedback.
7. **Admin Panel** – Manage products, orders, and customers.
